# Transition Timeline for Children and Adolescents with Special Health Care Needs: Chronic Illnesses / Physical Disabilities

Children and families experience many transitions, large and small, over the years. Predictable transitions occur when children leave early intervention, when they reach school age, when they approach adolescence, and when they move from adolescence into adulthood. Other transitions children make include moving into new programs, working with new agencies and care providers, and making new friends. Transitions involve changes: adding new expectations, responsibilities or resources, and letting go of others.

As a parent of a child with special health care needs you may be caught up in day to day survival. You may ask, "How can I think about tomorrow when I'm just trying to make it through today?" But when those moments come when you can catch your breath, it may be helpful to review this timeline and allow yourself to think about the future.

Tips: Review the timeline and identify where you are. Pick a place for action- you can't do everything at once! Link with others who have already transitioned.

---

Developed by the Adolescent Health Transition Project sponsored by the Children with Special Health Care Needs Program, Washington State Department of Health and the Clinical Training Unit, University of Washington, 1995. Based on a model developed by Dr. Stephen L. Kinsman, Kennedy Krieger Institute. 206-685-1358 <http://depts.washington.edu/healthtr/>

Infant Toddler Early  
Intervention Program

Rev 04/2007

# *Transition Timeline for Children and Adolescents with Special Health Care Needs: Chronic Illnesses / Physical Disabilities*

## **Parent and Child Interactions that Encourage Independence**

### **Birth to 3-5, or according to your child's developmental ability**

- Assure your infant the world is a good place in which to live. The development of a sense of trust is vital to the development of a healthy personality.
- You are your child's first teacher.
- Allow your child to develop at his/her own individual rate.
- As a parent it is important to take short breaks from your child to renew energy with which to enjoy him/her.
- Begin keeping a record of your child's early intervention, educational and medical history, including immunizations.

### **By ages 3-5, or according to your child's developmental ability**

- Assign your child chores appropriate for his/her ability level.
- Encourage decision-making skills by offering choices.
- Teach natural consequences of your child's behaviors and choices.
- Continue involvement in community and recreational activities that include children with and without special needs.
- Begin asking "What do you want to do when you grow up?"
- Begin teaching your child about his/her special health care need.
- Begin teaching your child self-care skills: general skills and those related to his/her special health care need.
- Begin helping your child interact directly with doctors, nurses, therapists, and teachers
- Begin teaching child about relationships, their body and personal space.

### **By ages 6-11, or according to your child's developmental ability**

- Assess your child's perception and basic knowledge of his/her special health care need. Build on their understanding.
- Continue teaching your child general self-care and health skills as well as skills related to his/her special health care need.
- Discuss relationships and personal safety with your child.
- Determine whether reasonable accommodations are needed to ensure equal access to school programs; if so, ask if your child qualifies for a 504 plan.
- Encourage hobbies and leisure activities; include exploring community and recreational activities, clubs, 4-H, Scouts, Campfire, YMCA, sports, etc.
- Continue to encourage decision making skills by offering choices.
- Continue assigning your child chores appropriate for his/her ability level.
- Take your child shopping whenever possible so he/she can help in choices.
- Let your child choose how to spend some or all of their allowance.
- Teach your child the consequences of his/her behaviors and choices.
- Allow your child to experience the consequences of a poor choice as well as a good choice.
- Begin teaching your child self-advocacy skills.
- Begin asking your child "What will you do when you grow up?"

### **By ages 12-18, or according to your child's developmental ability**

- Assess your teen's perception and basic knowledge of his/her special health care need. Fill in gaps in understanding.
- Continue teaching your teen general self-help and health skills as well as skills related to special health care need.
- Begin helping your teen keep a record of his/her medical history, including conditions, operations, treatments (dates, doctors, recommendations) and 504 plan if he/she has one.
- If teen has a 504 plan, encourage them to participate in any 504 meetings.
- Begin helping your teen take responsibility for making and keeping his/her own medical appointments, ordering his/her own supplies, etc.
- Begin exploring future health care coverage at age 17.
- Discuss relationships, sexuality and personal safety with your teen.
- Help your teen identify and build on his/her strengths.
- Explore support groups, if teen is interested.
- Begin to explore and talk about possible career interests with your teen.
- Help your teen find work and volunteer activities.
- Continue to allow your teen to help with family chores.
- Continue to encourage hobbies and leisure activities.
- Help your teen identify and be involved with adult or older teen role models.
- Begin, with your teen, looking for an adult health care provider.
- Encourage teen to contact campus disabled student services to request accommodations if he/she will be attending college.
- With teen, check eligibility for SSI the month he/she turns 18. At age 18, the teen's financial resources are evaluated, not the parents/guardians'.

### **By ages 18-21, or according to your child's developmental ability**

- Act as a resource and support to young adult.
- Encourage young adult to participate in support groups and/or organizations relevant to his/her special health care need.
- Finalize health care coverage with young adult.
- With young adult, finalize transfer of medical care to adult provider.
- For young adult attending college, encourage continued contact with disabled student services as needed for accommodations.
- Encourage young adult to investigate services provided by Department of Vocational Rehabilitation (DVR) if he/she has not already done so.
